

Moza R9 & Elgato Stream Deck Combo Information & Links

Elgato Stream Deck MK.2

The Elgato Stream Deck has a variety of uses and options that can be configured and customized to your preference. One of our favorites is iRacing in car cockpit buttons that can be used as well as some quick open applications and volume buttons for quick access. For more information on how to use and what it can be used for see some of the links below or search Google and Youtube for more information. If you install the iRaceIT plugin you will need to verify that the hotkeys selected for each button you create match the in game hotkey controls on iRacing.
